CAREER OBJECTIVE

As a passionate technology enthusiast with 2 years of hands-on experience in HTML, CSS, JavaScript, and Java, I thrive in dynamic, fast-paced work environments. My proficiency in front-end development and a strong grasp of Agile methodologies and SDLC enable me to create high-quality software solutions that precisely meet client requirements and exceed expectations. With a keen eye for business opportunities and a strategic mindset, I empower organizations to make data-driven decisions, driving growth and achieving success. As a versatile professional, my technical expertise and collaborative nature allow me to approach projects from multiple angles, building engaging and user-friendly applications that enhance user experiences. Additionally, my analytical skills help optimize processes and drive efficiency. Committed to innovation and continuous learning, I embrace new challenges and eagerly contribute to cutting-edge solutions in a collaborative team setting.

EXPERIENCE

PUBLIC HEALTH OUTREACH ANALYST — Philadelphia Dept of Public Health

Philadelphia, PA, *July 2022 – Present*

- Collaborated with teams to develop and maintained a Redcap web-based application for the Department of Public Health.
- Captured data for clinical research, ensuring accuracy and completeness of all data inputs.
- Updated technical documentation and user manuals for Redcap applications and databases, ensuring clear and precise information.
- Reported system issues with case investigation data through web-based platforms and provided actionable recommendations
- Assisted in facilitating 10 case investigations per day and efficiently tracked close contacts by collaborating with various COVID Containment branches.

PUBLIC HEALTH OUTREACH COORDINATOR — Philadelphia

Philadelphia, PA, *July 2021 – July 2022*

- Collaborate with community-based teams to participate in on-site containment activities and provide educational support
- Advise on COVID-19 control measures for cases and contacts, including guidance to the city of Philadelphia, schools, and early childhood education facilities
  Contribute to outbreak investigations by cooperating with team members and administrators
- Liaise with various COVID Containment branches, such as Operations, Testing, and Isolation and Quarantine, to offer timely support to COVID cases and contacts in school and ECE settings.

HEALTHCARE MANAGEMENT ANALYST — Accolade

Plymouth Meeting, Pa, *September 2018 – July 2021*

- Proactively identified, managed, and executed analyses to identify opportunities for process improvement and presented business recommendations

- Collaborated with stakeholders to define data gathering and metrics requirements, influencing the development of new features and platforms
- Supported sprint goals achievement by actively participating in grooming sessions and advocating for the Agile development process
- Acquired in-depth knowledge of design choices and available technology, becoming a subject matter expert (SME) for multiple areas
- Gathered feedback from customer account review teams and develop strategies for continuous improvement
