UZO IKEJIOFOR

SOFTWARE DEVELOPER

917-573-0130 ● uzoikejiofor@gmail.com

As a passionate technology enthusiast with 2 years of hands-on experience in HTML, CSS, JavaScript, and Java, I thrive in dynamic, fast-paced work environments. My proficiency in front-end development and a strong grasp of Agile methodologies and SDLC enable me to create high-quality software solutions that precisely meet client requirements and exceed expectations. With a keen eye for business opportunities and a strategic mindset, I empower organizations to make data-driven decisions, driving growth and achieving success. As a versatile professional, my technical expertise and collaborative nature allow me to approach projects from multiple angles, building engaging and user-friendly applications that enhance user experiences. Additionally, my analytical skills help optimize processes and drive efficiency. Committed to innovation and continuous learning, I embrace new challenges and eagerly contribute to cutting-edge solutions in a collaborative team setting.

EXPERIENCE

JUL '22 - PRESENT

Public Health Outreach Analyst │ Philadelphia Dept of Public Health, Philadelphia, PA

- Collaborated with teams to develop and maintain a Redcap web-based application for the Department of Public Health.
- Troubleshoot and debug issues to ensure optimal performance and user experience
- Collaborate with the development team to design, develop, and maintain web applications
- Captured data for clinical research, ensuring accuracy and completeness of all data inputs.
- Updated technical documentation and user manuals for Redcap applications and databases, ensuring clear and precise information.
- Reported system issues with case investigation data through web-based platforms and provided actionable recommendations
- Assisted in facilitating 10 case investigations per day and efficiently tracked close contacts by collaborating with various COVID Containment branches.

JUL '21 - JUL '22

Public Health Outreach coordinator │ Philadelphia, Philadelphia, PA

- Collaborate with community-based teams to participate in on-site containment activities and provide educational support
- Advise on COVID-19 control measures for cases and contacts, including guidance to the city of Philadelphia, schools, and early childhood education facilities
Contribute to outbreak investigations by cooperating with team members and administrators
- Liaise with various COVID Containment branches, such as Operations, Testing, and Isolation and Quarantine, to offer timely support to COVID cases and contacts in school and ECE settings.

SEP '18 - JUL '21

Healthcare Management Analyst | Accolade, Plymouth Meeting, Pa

- Proactively identified, managed, and executed analyses to identify opportunities for process improvement and presented business recommendations
- Collaborated with stakeholders to define data gathering and metrics requirements, influencing the development of new features and platforms
- Supported sprint goals achievement by actively participating in grooming sessions and advocating for the Agile development process
- Acquired in-depth knowledge of design choices and available technology, becoming a subject matter expert (SME) for multiple areas
- Gathered feedback from customer account review teams and develop strategies for continuous improvement
